EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Francis Lammes (Reg. No. 55,353) on December 15, 2004.

3. **The application has been amended as follows:**

Replace claim 1 as follows:

1. A method of calling a portion of computer code in a multithreaded environment, wherein the portion of computer code is a Java method having an associated method block including a field that includes a pointer that points to a Java Virtual Machine (JVM) interpreter before a Just-In-Time (JIT) compiler is loaded, points to a JIT compiler routing CompileThisMethod when the JIT compiler is loaded, and points to a routine which calls a compiled version of the method once the method is compiled by the JIT compiler, the method comprising:

receiving a call to the portion of computer code;

determining if the portion of computer code is currently being compiled based on information stored in fields of the method block; and

redirecting the call to an interpreter, if the portion of computer code is currently being compiled.

Cancel claims 2 and 8-10.

Replace claim 11 as follows:

11. An apparatus for calling a portion of computer code in a multithreaded environment, wherein the portion of computer code is a Java method having an associated method block including a field that includes a pointer that points to a Java Virtual Machine (JVM) interpreter before a Just-In-Time (JIT) compiler is loaded, points to a JIT compiler routing CompileThisMethod when the JIT compiler is loaded, and points to a routine which calls a compiled version of the method once the method is compiled by the JIT compiler, comprising:

a processor;

receiving means for receiving a call to the portion of computer code;

first determination means for determining if the portion of computer code is currently being compiled based on information stored in fields of the method block; and

first redirection means for redirecting the call to an interpreter, if the portion of computer code is currently being compiled.

Cancel claims 12 and 18-20.

Replace claim 21 as follows:

Art Unit: 2127

21. A computer program product in a computer readable medium for calling a portion of computer code in a multithreaded environment, wherein the portion of computer code is a Java method having an associated method block including a field that includes a pointer that points to a Java Virtual Machine (JVM) interpreter before a Just-In-Time (JIT) compiler is loaded, points to a JIT compiler routing CompileThisMethod when the JIT compiler is loaded, and points to a routine which calls a compiled version of the method once the method is compiled by the JIT compiler, comprising:

first instructions for receiving a call to the portion of computer code;

second instructions for determining if the portion of computer code is currently being compiled based on information stored in fields of the method block; and

third instructions for redirecting the call to an interpreter, if the portion of computer code is currently being compiled.

Cancel claims 22 and 28-30.
